Skills

Languages: Python, Java, Go, Bash, JavaScript, SQL

Cloud Platforms: AWS, GCP, Azure

DevOps & CI/CD: GitHub Actions, Concourse CI, Argo CD, Azure DevOps, Bamboo, Git

Containerization: Docker, Kubernetes (EKS, GKE)

Infrastructure as Code: Terraform, Ansible, CloudFormation

OS & Scripting: Linux (RHEL/Ubuntu), Shell Scripting, Windows

Other Tools: Prometheus, Helm, REST APIs, Agile, GitOps, SDLC Best Practices

Work Experience

LTIMindtree

Jun 2023 - Present

Engineer - Cloud & Infrastructure

- Collaborated with cross-functional development teams to optimize CI/CD workflows using GitHub Actions and Azure DevOps, reducing deployment time by 40% and improving release reliability.
- Programmatically integrated and consumed RESTful APIs across microservices to ensure seamless data flow and orchestration in cloud-native applications.
- Developed internal DevOps accelerators using Python and Bash, simplifying containerized deployment pipelines and reducing repetitive manual tasks.
- Designed and deployed secure, scalable infrastructure using Terraform and Ansible across AWS and GCP environments, following Infrastructure as Code (IaC) best practices.
- Containerized applications using Docker and managed deployments on Kubernetes (EKS/GKE), focusing on autoscaling, observability, and high availability.
- Performed automated configuration management using Ansible, managing 100+ server nodes across staging and production environments.
- Worked on Concourse CI and Argo CD pipelines to streamline code promotion, ensuring consistent build and deployment standards across teams.
- Provided hands-on Linux system administration, scripting automation for patching, log rotation, and performance monitoring.
- Actively contributed to code reviews and documentation to uphold SDLC standards and cross-team DevOps governance.
- Championed Agile DevOps culture by mentoring junior engineers, running internal tooling demos, and introducing new open-source innovations into the toolchain.

Project Work

- **Service Weaver Code Generator (2024):** Automated service orchestration by generating inter-component communication code from ASTs using Java. Focused on modular architecture and reduced manual networking code across microservices. Improved maintainability and deployment consistency across cloud environments.
Technical Skills: Java, JDK Compiler, Protobuf, Microservices, CI/CD
- **Neem Medicinal Value Prediction App (2023):** Designed and deployed ML-powered mobile app with local vision model inference, integrated with cloud storage for results aggregation. Built internal tools for data sync and monitoring, enabling scalable model retraining pipelines. Focused on cloud efficiency and performance monitoring.
Technical Skills: Flutter, Machine Learning, Image Processing, YOLO, Cloud Integration, Performance Monitoring
- **Wafer Fault Prediction (2022):** Built a fully automated ML pipeline using Python and deployed it on AWS with CI/CD integration. Created containerized services for data ingestion, model inference, and monthly retraining. Set up infrastructure monitoring and cost tracking to ensure resource-efficient operation in production.
Technical Skills: Python, FastAPI, CI/CD, Docker, AWS EBS, XGBoost, Monitoring & Cost Optimization

Awards and Certificates

- **AWS Certified Developer Associate** - <https://shorturl.at/yWyR7>
- **AWS Certified Data Engineer Associate** - <https://shorturl.at/65ncx>
- **Google Cloud Certified Professional Cloud Architect** - <https://shorturl.at/afCAG>
- **Mentor at LTIMindtree:** Helping graduates and working professionals to get trained on latest technologies
- Full Stack Data Science Bootcamp by Inueron

Education

Bharathiar University	July 2024 - July 2026
Master of Computer Applications	
Relevant Coursework: Computer Networks, Relational Database, Machine Learning	
Sri Ramakrishna College of Arts and Science	July 2020 - May 2023
Bachelor of Computer Science	CGPA: 8.7/10
Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Machine Learning, Signal processing, vector calculus, Deep Learning, Computer Vision, NLP
